BlueFin Marine Super Cleaner

This versatile super cleaner can be used on most marine surfaces and related equipment, such as decks, tools, trailers, and more.

The non-corrosive cleaner can be used on most surfaces without risk of abrasion, and without cumbersome personal protection equipment. Removes scum and grime with ease!

BlueFin Marine Super Cleaner & Degreaser easily removes heavy-duty stains, grease, dirt and other stains from boats or other marine equipment. Designed to clean a multitude of surfaces, this product removes a need for many different chemicals for cleaning. Easy to use, it can be simply sprayed on soiled surfaces and then wiped or scrubbed away, taking the dirt and grime with it.

Bluefin Marine Super Cleaner & Degreaser outperforms other cleaning products, even those with harsh chemicals. It is specially formulated to dissolve dirt and grime without toxins. Biodegradable and eco-friendly.

Black Streak Removal

1. Spray BlueFin Marine Super Cleaner & Degreaser onto area affected with water spots and water stains. Allow product to remain for some time on extremely hard to remove stains.
2. Agitate lightly with a Boat Body Brush with medium to soft flagged tip bristles.
3. Rinse.
4. After removing water spots and stains with the BlueFin Marine Super Cleaner & Degreaser, apply Polish & Sealant to create a protective barrier against the water stains.

Boat Washing

1. Pour 1-2oz. BlueFin Marine Super Cleaner & Degreaser per gallon of water into a bucket (hot water will increase efficiency).
2. Apply to a cool surface, using a clean sponge, washing brush, or wash mitt.
3. Before solution dries, rinse with a flow of water (not spray) so water sheets off surface.
4. Wipe dry with a clean chamois.

Follow up with an application of Wax for the ultimate shine and protection. Test older surfaces, chalked and sensitive paints and finishes on a small, inconspicuous area first. It is recommended to dilute per application on sensitive or heavily oxidized finishes.
