

100% Pure Pumice Stone cleans pool surfaces safely and effectively!

Get your swimming pool tiles clean and ready for the summer. Works where chemicals fail! All natural pumice stone is safe for most pool surfaces, and will help your swimming pool regain its shine.

The Pool Blok is non toxic, and chemically neutral, so it will not upset your swimming pool's pH balance, and is also safe for use around children and pets.

Lasts up to 6 times longer than fibreglass stones!

The Original Pool Blok

The Pool Blok effectively removes rust, mineral build-up, lime, mold, mildew, stains, hard water stains and algae deposits from ceramic tiles with ease.

Made of all natural pumice stone, the Pool Blok is safe for most pool surfaces, including tile, grout, concrete and gunite. Rub out deposits without harming ceramic tile or pool plaster.

The Pool Blok floats, so you do not need to drain your pool to use. Ideal as a spot cleaner, the Pool Blok shapes to any surface, proving more effective than ordinary tile or grout cleaners.

Use on Pools, spas, water features, fountains, etc.

OneClean Pool Blok Cleaning Brick Holder

Made of lightweight cast aluminum, the reusable OneClean Brick Holder offers long life, has adjustable set screws that fit all standard size grill bricks from 2.25 to 3.5 inches in width.

Used with Pool Blok, the job of removing rust, mineral build-up, lime, mold, mildew stains and algae deposits goes faster and with less effort.

Patented design gives you sure grip and comfort!

Directions for use

Ensure that the Pool Blok and the surface to be cleaned are very wet. Rub the Pool Blok against the surface to be cleaned. Do not press too hard - let the naturally abrasive pumice stone do the work. Frequently rinse out the Pool Blok either in the pool or with a hose. Always keep wet while cleaning, for best results.

For cleaning grout, hold the Pool Blok tilted slightly on edge. This will help the pumice stone conform more quickly to the shape of your pool's tile and grouting.

Not recommended for use on overglazed tile decorations, vinyl, acrylic fibreglass, wood or polished metal surfaces, above ground pools or plastic liners. Always test on a small inconspicuous area first.
